CLOUDAXIS CYBER

Fast and Quality Digital & ICT Services

Making digital services accessible, affordable and convenient in Kakuma Town.

First Draft Pitch Deck • 2026

The Problem

A local digital-access gap creates time, cost and convenience challenges.

Limited access

Residents may need to travel or wait to access reliable digital and document services.

Complex online services

Government and other online processes can be difficult for people who need practical assistance.

ICT support gap

Individuals and small businesses need affordable help with computers, software and basic technical problems.

Our Solution

One convenient local hub for everyday digital and ICT needs.

CloudAxis Cyber brings online services, printing, document services and basic ICT support together in one location.

Customers receive practical assistance instead of navigating complicated processes alone.

Fast, affordable and customer-focused service designed for students, job seekers, families and small businesses.

Located in Kakuma Town, next to Good Shepherd.

Our Services

A broad service mix creates multiple revenue streams.

eCitizen & KRA services

Convenient, affordable and assisted service.

HELB, NTSA & Good Conduct

Convenient, affordable and assisted service.

Printing & photocopying

Convenient, affordable and assisted service.

Lamination & binding

Convenient, affordable and assisted service.

Computer & Windows support

Convenient, affordable and assisted service.

Document preparation & digital assistance

Convenient, affordable and assisted service.

Target Customers

People and organizations that need frequent digital and document support.

Students and trainees — applications, assignments, printing and document preparation.

Job seekers — online applications, CVs, printing and government documentation.

Small businesses — printing, digital services and basic computer support.

Parents and community members — online government services and document processing.

Organizations — bulk printing, binding and other document services.

Market Opportunity

Digital adoption creates a recurring need for assisted services.

Growing digital services

More public and private services are moving online, creating demand for people who can provide hands-on digital assistance.

Recurring demand

Printing, applications, photocopying and document services are repeat-use services rather than one-time purchases.

Local opportunity

Kakuma Town provides an opportunity to build a trusted, convenient ICT-services brand close to customers.

Business Model

CloudAxis Cyber earns revenue through pay-per-service transactions.

Customers pay for individual services such as printing, photocopying, lamination, binding and online applications.

Premium or technical services can be priced according to time, complexity or materials used.

Bulk jobs from organizations and businesses can provide larger-value orders.

Future growth can include additional ICT products, equipment services and business support.

Competitive Advantage

We compete through convenience, service range and technical capability.

One-stop service

Customers can handle several digital and document needs in one place.

ICT skills

Technical knowledge supports computer troubleshooting and digital assistance beyond ordinary cyber services.

Customer focus

Fast turnaround, clear communication and affordable services help build trust and repeat customers.

Go-to-Market Strategy

Build awareness locally and convert first-time visitors into repeat customers.

WhatsApp and social-media promotion using service lists, offers and customer updates.

Visible flyers, posters and shop branding around Kakuma Town.

Word-of-mouth referrals supported by reliable and fast service.

Partnerships with schools, community organizations and small businesses.

Simple promotions for repeat customers and bulk printing/document orders.

Traction & Milestones

Current progress and the next steps for growth.

Current

CloudAxis Cyber established in Kakuma Town with a defined service offering and local customer focus.

Next 6 months

Increase customer awareness, strengthen equipment capacity, improve service turnaround and build recurring organizational clients.

Long term

Grow into a trusted local digital-services and ICT-support brand with expanded equipment and service capacity.

Financial Plan & Funding Need

First-draft assumptions — replace with your actual figures before submission.

Revenue

Primary revenue: printing, photocopying, online services, lamination, binding and ICT support.

Track daily sales by service to establish real monthly averages.

Key costs

Equipment and maintenance
Paper & consumables
Internet/electricity
Rent and operating costs
Marketing

Funding use

Priority: additional computers/printers, security equipment, internet capacity, branding and working capital.

Funding target: KSh [INSERT AMOUNT].

THE ASK

Support CloudAxis Cyber to expand equipment, reach more customers and make digital services faster and easier to access in Kakuma.

We are seeking funding, partnerships and mentorship to grow sustainably.
